Prioritized Action Table

Priority	Recommended Action
P1	Exclude or visibly flag incomplete periods before reporting a trend.
P1	Govern channels with a scorecard covering MQL volume, conversion, matched-value, activation and M3 retention as a guardrail.
P1	Instrument onboarding checkpoints at 7, 30 and 60 days and test interventions rather than assuming a causal fix.
P1	Prioritize delivery investigations using order volume × delay severity × review penalty, then test operational changes.
P2	Monitor top 1/5/10/20% shares and investigate categories where high value combines with weak seller breadth.
